Why Grandstream's GXP2130 Enterprise IP Phone ?

1 **VIBRANT COLOR-SCREEN DISPLAY**
Modernize your desktop experience with a display that looks just like your mobile

The GXP2130 offers a vibrant 2.8" full-color display that brings your desk phone experience into the 21st century. The full-color display offers enhanced usability and a visual experience similar to mobile phones. Interacting with your IP phone has never been as easy and eye-pleasing.

Gigabit   PoE   HD Audio   Encryption   EHS Capability

2 **BROAD INTEROPERABILITY**
Deploy the GXP2130 with any SIP-based provider without compatibility concerns

Like all Grandstream products, the GXP2130 is a SIP device which enables it to be seamlessly implemented with any PBX, hosted platform, softswitch, or service provider based on the open-source SIP standard. The GXP2130 is compatible with all major SIP providers, such as Broadsoft, Asterisk, Elastix, and Metaswitch. Deploy the GXP2130 without worrying about changing your platform in the future.

3 **A SIMPLE-TO-USE DESKTOP IP PHONE WITH ADVANCED FEATURES**
The GXP2130 offers state-of-the-art telephony features that increase productivity

The GXP2130 is a simple-to-use IP phone with an attractive interface and all of the calling features you need. The phone features to up 3 lines, 3 SIP accounts, a 2.8" vibrant color display, 4-way conferencing, HD audio on the speaker and handset, Electronic Hook Switch (EHS) support for Plantronics headsets, 4 programmable soft keys, Gigabit network ports, a fail over SIP server, state of the art encryption protection, and much more.

4 **QUICK/EASY ACCESS TO YOUR CONTACTS**
8 BLF extension keys, Downloadable Phonebooks, and 2000 person contact book

The GXP2130 includes multiple features that make it easier than ever to access your contacts. 8 dual-color BLF/extension keys are included to offer 1-touch access to important contacts at the touch of a finger. Users can also download LDAP phonebook files on the GXP2130. The phone also has built-in support for up to 2000 contacts.

5 **INTEGRATE WITH THE UCM6100 SERIES FOR RAPID DEPLOYMENT AND ADDITIONAL FUNCTIONALITY**
Setup and Provision GXP2130 in minutes with Zero Config

The GXP2130, as well as all Grandstream IP endpoints, can be quickly provisioned through the Zero Configuration feature on the UCM6100 series, which allows for setup of an entire Grandstream solution in just minutes. The UCM6100 series' Web UI allows for central and remote management of the entire solution. The UCM6100 series also offers the GXP2130 an extra set of features, such as 1-touch call recording, CDR, voicemail forwarding to email, access to LDAP phonebooks, and more.

6 **ACHEIVE THE FASTEST POSSIBLE NETWORK SPEEDS**
Dual Gigabit network ports offer quick connections and crystal-clear audio

Integrated dual Gigabit network ports on the GXP2130 allow the phone to acheive the fastest possible connection speeds available, up to 1000mb/second. This ensures that all calls and pages go through as quickly and as clearly as possible to allow the users to be as productive as possible.
