KX-NT300 Series **IP Telephones**

Enhanced Communications Solutions

PDF Eraser Free

Powerful Communication Features that Fit Your Budget.

Manage communication between multiple locations or remote employees with a system that delivers real value now ... and real flexibility for the future.

Improve productivity with consistent, reliable communication.

The Panasonic IP telephony solution integrates your remote employees and locations by giving them easy access to your corporation's central communication hub, letting them enjoy the feature-rich capabilities of their Panasonic Communications System.

Combine the power of your data network with the convenience of the business phone.

Because the Panasonic IP telephony system uses what's called Power-over-Ethernet, or PoE, you don't need a phone jack. You can move your office phones to any location you want simply by plugging into another data port—no new phone numbers or extensions are needed. That's a big plus for any business with an eye on growth.

Powerful, Versatile Connectivity

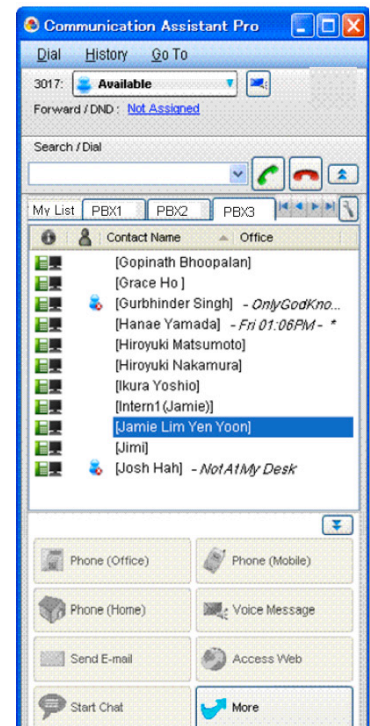

Communication Assistant Productivity Application Suite

Harness the power of your Panasonic Telephone System with our groundbreaking Communication Assistant. This highly-intuitive application suite for the NCP and TDE platforms provides the following key features:

- Seamless Networking & Searching Across Multiple Platforms
- Enhanced Voice Messaging (VMA)
- Versatile, Intuitive Conferencing Capability
- Instant Messaging (Chat) and Presence Capabilities
- Microsoft® Outlook®, CRM (TAPI) and Third Party Database (LDAP) Contact Integration

In addition, you can access presence information on up to 8 other Panasonic PBXs and search and update contacts, initiate chat or make and transfer calls across the network (server version required).

Communication Assistant productivity software offers an affordable, flexible and reliable solution to help your business lower costs, increase revenue, improve customer satisfaction and increase employee productivity.
